

# INTELLEDOX & SHAREPOINT

## Creating Document & Content Harmony

Intelledox with Microsoft SharePoint helps your organisation get better value from your Enterprise Content Management (ECM) investment. For most organisations there are numerous business challenges to managing information including but not limited to:

- Management of corporate content and the presentation of it to various audiences
- Accurate and compliant communications with customers, partners and suppliers
- Efficient use of available resources and time
- Efficient use of corporate technology
- Implementation of true IT enablement strategies and tools.
- The ability to quickly and accurately respond to customers
- The ability to meet legislative, legal, corporate, audit and quality requirements

**"The combination of Intelledox and Microsoft SharePoint allows organisations to focus on their core business, and achieve Content Harmony."**

The combination of Intelledox and Microsoft SharePoint allows organisations to focus on their core business, and achieve Content Harmony.

With the Intelledox/Microsoft SharePoint ECM solution in place, document creation is put back into the hands of the business line where staff can:

- Create and find documents quickly through automatic setting of metadata
- Capture, access, use and reuse critical content
- Control the content staff have access to use, ensuring accuracy
- Organise contents in context (documents) that are then stored, protected and reused
- Apply business rules to content and contracts which assist with compliance and good governance

With the implementation of Intelledox and Microsoft SharePoint organisations can achieve content harmony and reap the following benefits.

FEATURES	BENEFITS
<b>Re-use existing content</b>	Reduced double entry Increased accuracy
<b>Automation of business processes</b>	Improved efficiency Concentration on core activities Reduced time checking/reviewing drafts
<b>Integration to line of business applications</b>	Saves time Uses existing data Uses existing systems
<b>Use existing templates</b>	No redesign Known look and feel
<b>No macros</b>	No reliance on IT developers/designers
<b>COTS solution</b>	No customisation
<b>Configurable</b>	Meets expectations No unexpected development costs
<b>Access to the right content and documents</b>	Achieves compliance
