

# INTELLEDOX FEATURES & BENEFITS

Intelledox is a leader in the emerging field of automated document creation and output management software. Document workflow automation assists organizations in producing documents in any volume such as contracts, tenders, insurance forms, customer correspondence and technical manuals. Providing centralized control of branding and compliance issues, Intelledox cuts the time it takes to create, customise and distribute a document by an average of 50 per cent.

Intelledox draws on the native power of Microsoft Word - a universally familiar environment. It is a web-based, XML driven solution that allows users to publish templates out across the enterprise, centralising and automating the generation of documents. With no scripting requirements, template design can be easily handled by business units rather than the IT department.

## Features

**Wizard-driven:** Intelledox automates the process of creating and maintaining template content, layout, workflow and data for administrators without the need for programming and enables users to generate documents by following easy steps according to build in business rules.

**High volume processing:** The XML server-side rules engine can process in excess of 150,000 documents per hour. Bulk generation is possible, producing thousands of documents instantly with one click.

**Web-based:** All interaction with Intelledox happens through Internet Explorer. No end user installation required.

**Multi-format output:** Intelledox outputs in multiple formats, including .DOC, PDF, OpenDoc, RTF.

**Centralized document management:** All corporate templates are accessed, generated, and maintained in one place.

**Multi-channel delivery:** Intelledox can deliver documents via e-mail, fax, XML, send them to print, or simply store in the repository.

**Seamless integration:** Intelledox is highly extensible and ready to integrate seamlessly with your existing data systems including traditional OLE-DB and ODBC relational data, RSS feeds and Web Services, as well as line of business applications, such as CRM systems.

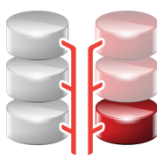

**Built with Microsoft technologies:** Intelledox is built on proven world-class Microsoft technologies, including the .NET Framework, Internet Information Server (IIS) and Microsoft SQL Server.

**Permission driven:** Build in security roles ensure that only authorized users can create, maintain and generate templates.

**Metadata:** Intelledox automatically attaches key words (metadata) to a document. Allows future retrieval of the doc. Usually a step that employees could understandably not be bothered with.

**Scalable:** Intelledox is robust, scalable and easy to configure and maintain.

**Multi-lingual web interface:** To suit the global business environment, Intelledox is available in multiple languages.

## Benefits

- Reduces cost of document production across the enterprise
- Reduces cost of document template management
- Reduces effort of design and maintenance of documents
- Increases productivity, as documents are produced in seconds
- Improves accuracy and compliance by eliminating the risk of error and omissions
- Increases accountability by keeping an audit trail of who has generated which documents
- No scripting language, graphical design environment
- No more macros. No need for programmers to work with templates
- Uses Microsoft Word® as the base template editor – anyone who is familiar with Word® can create and update document templates
- Seamlessly integrates with existing applications, increasing their efficiency and adding value to your business
- Quick and easy to install and use; minimum training required
- Reduces your Total Cost of Ownership (TCO) by providing a centralized deployment model

### ABOUT INTELLEDOX

Intelledox is a 4<sup>th</sup> generation document creation system and specifically addresses what leading analysts refer to as "content chaos" caused by a lack of a structured and centralized approach to document generation. Intelledox creates significant business advantage through the automation of document-centric business processes. By leveraging existing investment in document management and information assets, Intelledox assists organizations to drive down operational costs, deliver increased efficiency, reduce compliance risk, and improve user experience. Intelledox has delivered high quality enterprise software solutions to a growing portfolio of large corporate and government customers across the globe. Currently some 300 customers and 400,000 users benefit from the solutions developed by Intelledox Pty Ltd. Headquartered in Australia, Intelledox has an international presence across the globe with offices in the North America, Singapore, and the United Kingdom.
